Election/Restrictions

Restriction is required under 35 U.S.C.

Newly submitted claim 1-11, 24-46 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: In the new claims, the new limitations are considered vital (see page 7 of the Amendment, i.e., the fourth paragraph discussing "the 'static mobile identifier' and the associated 'updated identifiers', as recited"). The new claims are no longer directed to cryptography of the content of a wireless communication such as the original set of claims – Class 380, subclass 270. Instead, the novelty (as claimed and argued in the amendment) now lays in the preventing unauthorized communications, such as access blocking – Class 455, subclass 26.1.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 1-11, 24-46 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.
